

3. Students will then manipulate the image on the computer using Adobe Photoshop software.
4. Students will print out picture to serve as guide

(If painting design:)

- Students will then draw on canvas a light sketch.
- Students will carefully mix and paint canvas.
- Students will build on 1st layer by applying more paint.
- Students will use appropriate brushes for details.

Assessment:

Did students manipulate the image using the Adobe Photoshop program?

Is color scheme evident? Is creativity evident? Are the art elements and Principles of Design evident in composition?

(If painting: Did students execute paint well? Is paint evident of being mixed? Was various brushes used in painting?)

Special Considerations:

None
